

20 YEARS OF IMPACT

Changing One Life At A Time

ANNUAL REPORT

MARCH 2023-FEBRUARY 2024

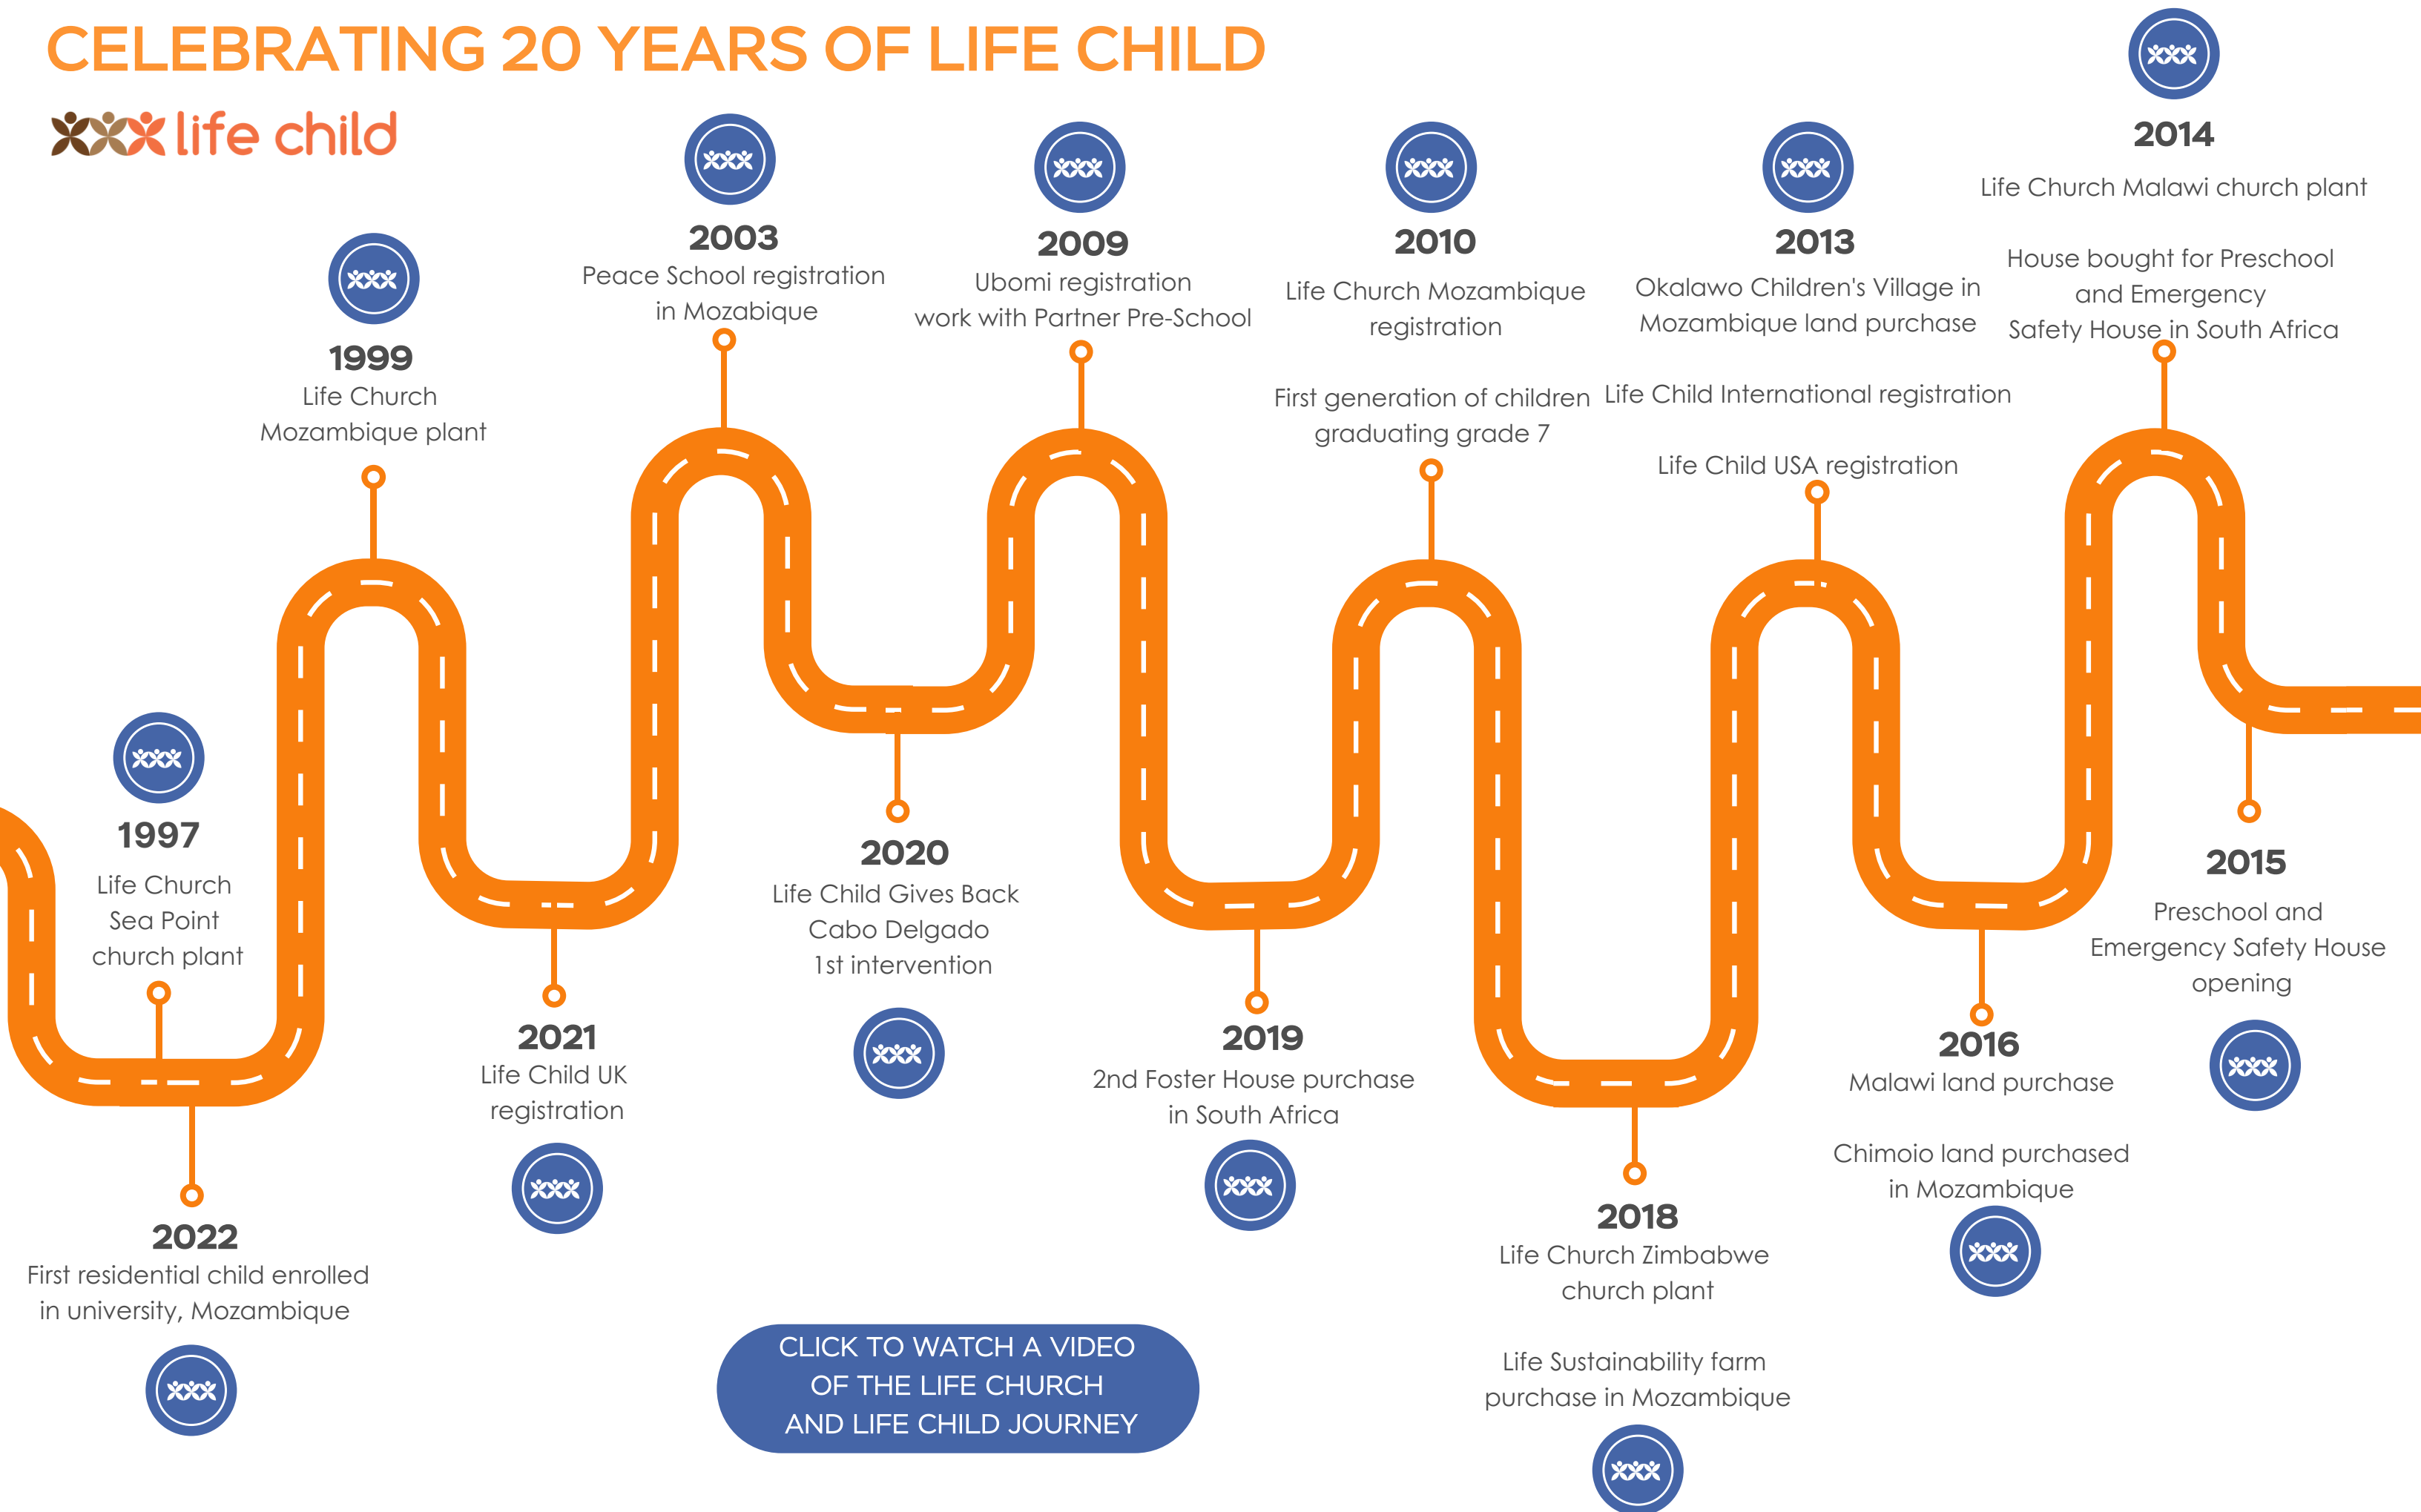

A group of African children, mostly girls, are standing in a line on a dirt path in a tropical setting with palm trees in the background. They are all holding up large white and orange balloons with their right hands. The children are wearing colorful, patterned dresses and skirts. The scene is bright and sunny, with shadows cast on the ground.

A MESSAGE FROM LIFE CHILD CEO & CO-FOUNDER

STANDING THE TEST OF TIME

“Indeed, love, kindness, and generosity will always stand the test of time. That is exactly why Life Child has stood for 20 years pouring itself out on behalf of the orphan and vulnerable children of Sub-Saharan Africa. These Divine attributes have been seen over and over again, either through the staff, the volunteers, and especially the partners of Life Child. Thank you to everyone who has helped champion the cause of Life Child for so many years and helped us stand the test of time.”

Anthony Liebenberg

A MESSAGE FROM LIFE CHILD CO-FOUNDER & INTERNATIONAL PROJECT DEVELOPMENT DIRECTOR

“Family Strengthening has and continues to be significant in impacting the lives of the children that we serve. Children's families must grow in their capacity to maintain their families together. The indices of intro trafficked children, premature pregnancies, and unions have increased in our communities especially those impacted by cyclones and floods. The focused approach of 'Child, Family, Community' by intentionally sharing the gospel, pastoring, educating, and strengthening our families through a close follow-up from house to house continues to strengthen. We truly believe that for us to see long-lasting sustainable changes we must not put the families aside, but embrace and continue trusting God for Christ-centered family-driven communities transformed into economic sustainability.”

Annmarce Jorge

A MESSAGE FROM LIFE CHILD CO-FOUNDER

“Amidst so many adversities, Life Child operates with a holistic approach, aiming for the integral development of children. Far from just offering knowledge and practical tools, Life Child strives to promote emotional and spiritual healing in children. Knowing that building a solid identity in Christ is the safest path amid the turmoil that surrounds them. Through a life purpose deeply rooted in Christian values, Life Child becomes a beacon of hope amid chaos, not only caring for the immediate needs of these children but also guiding them towards a brighter future, strengthening their identity in God. With love and dedication, the Life Child team becomes the family that many of them have lost, nourishing the children with God's tenderness and encouraging them to discover their worth, their strength, and their divine purpose. It is a work of transformation that goes beyond the limits of the material, reaching the most intimate part of each heart.”

Esvaldo Jorge

A MESSAGE FROM LIFE CHILD CO-FOUNDER

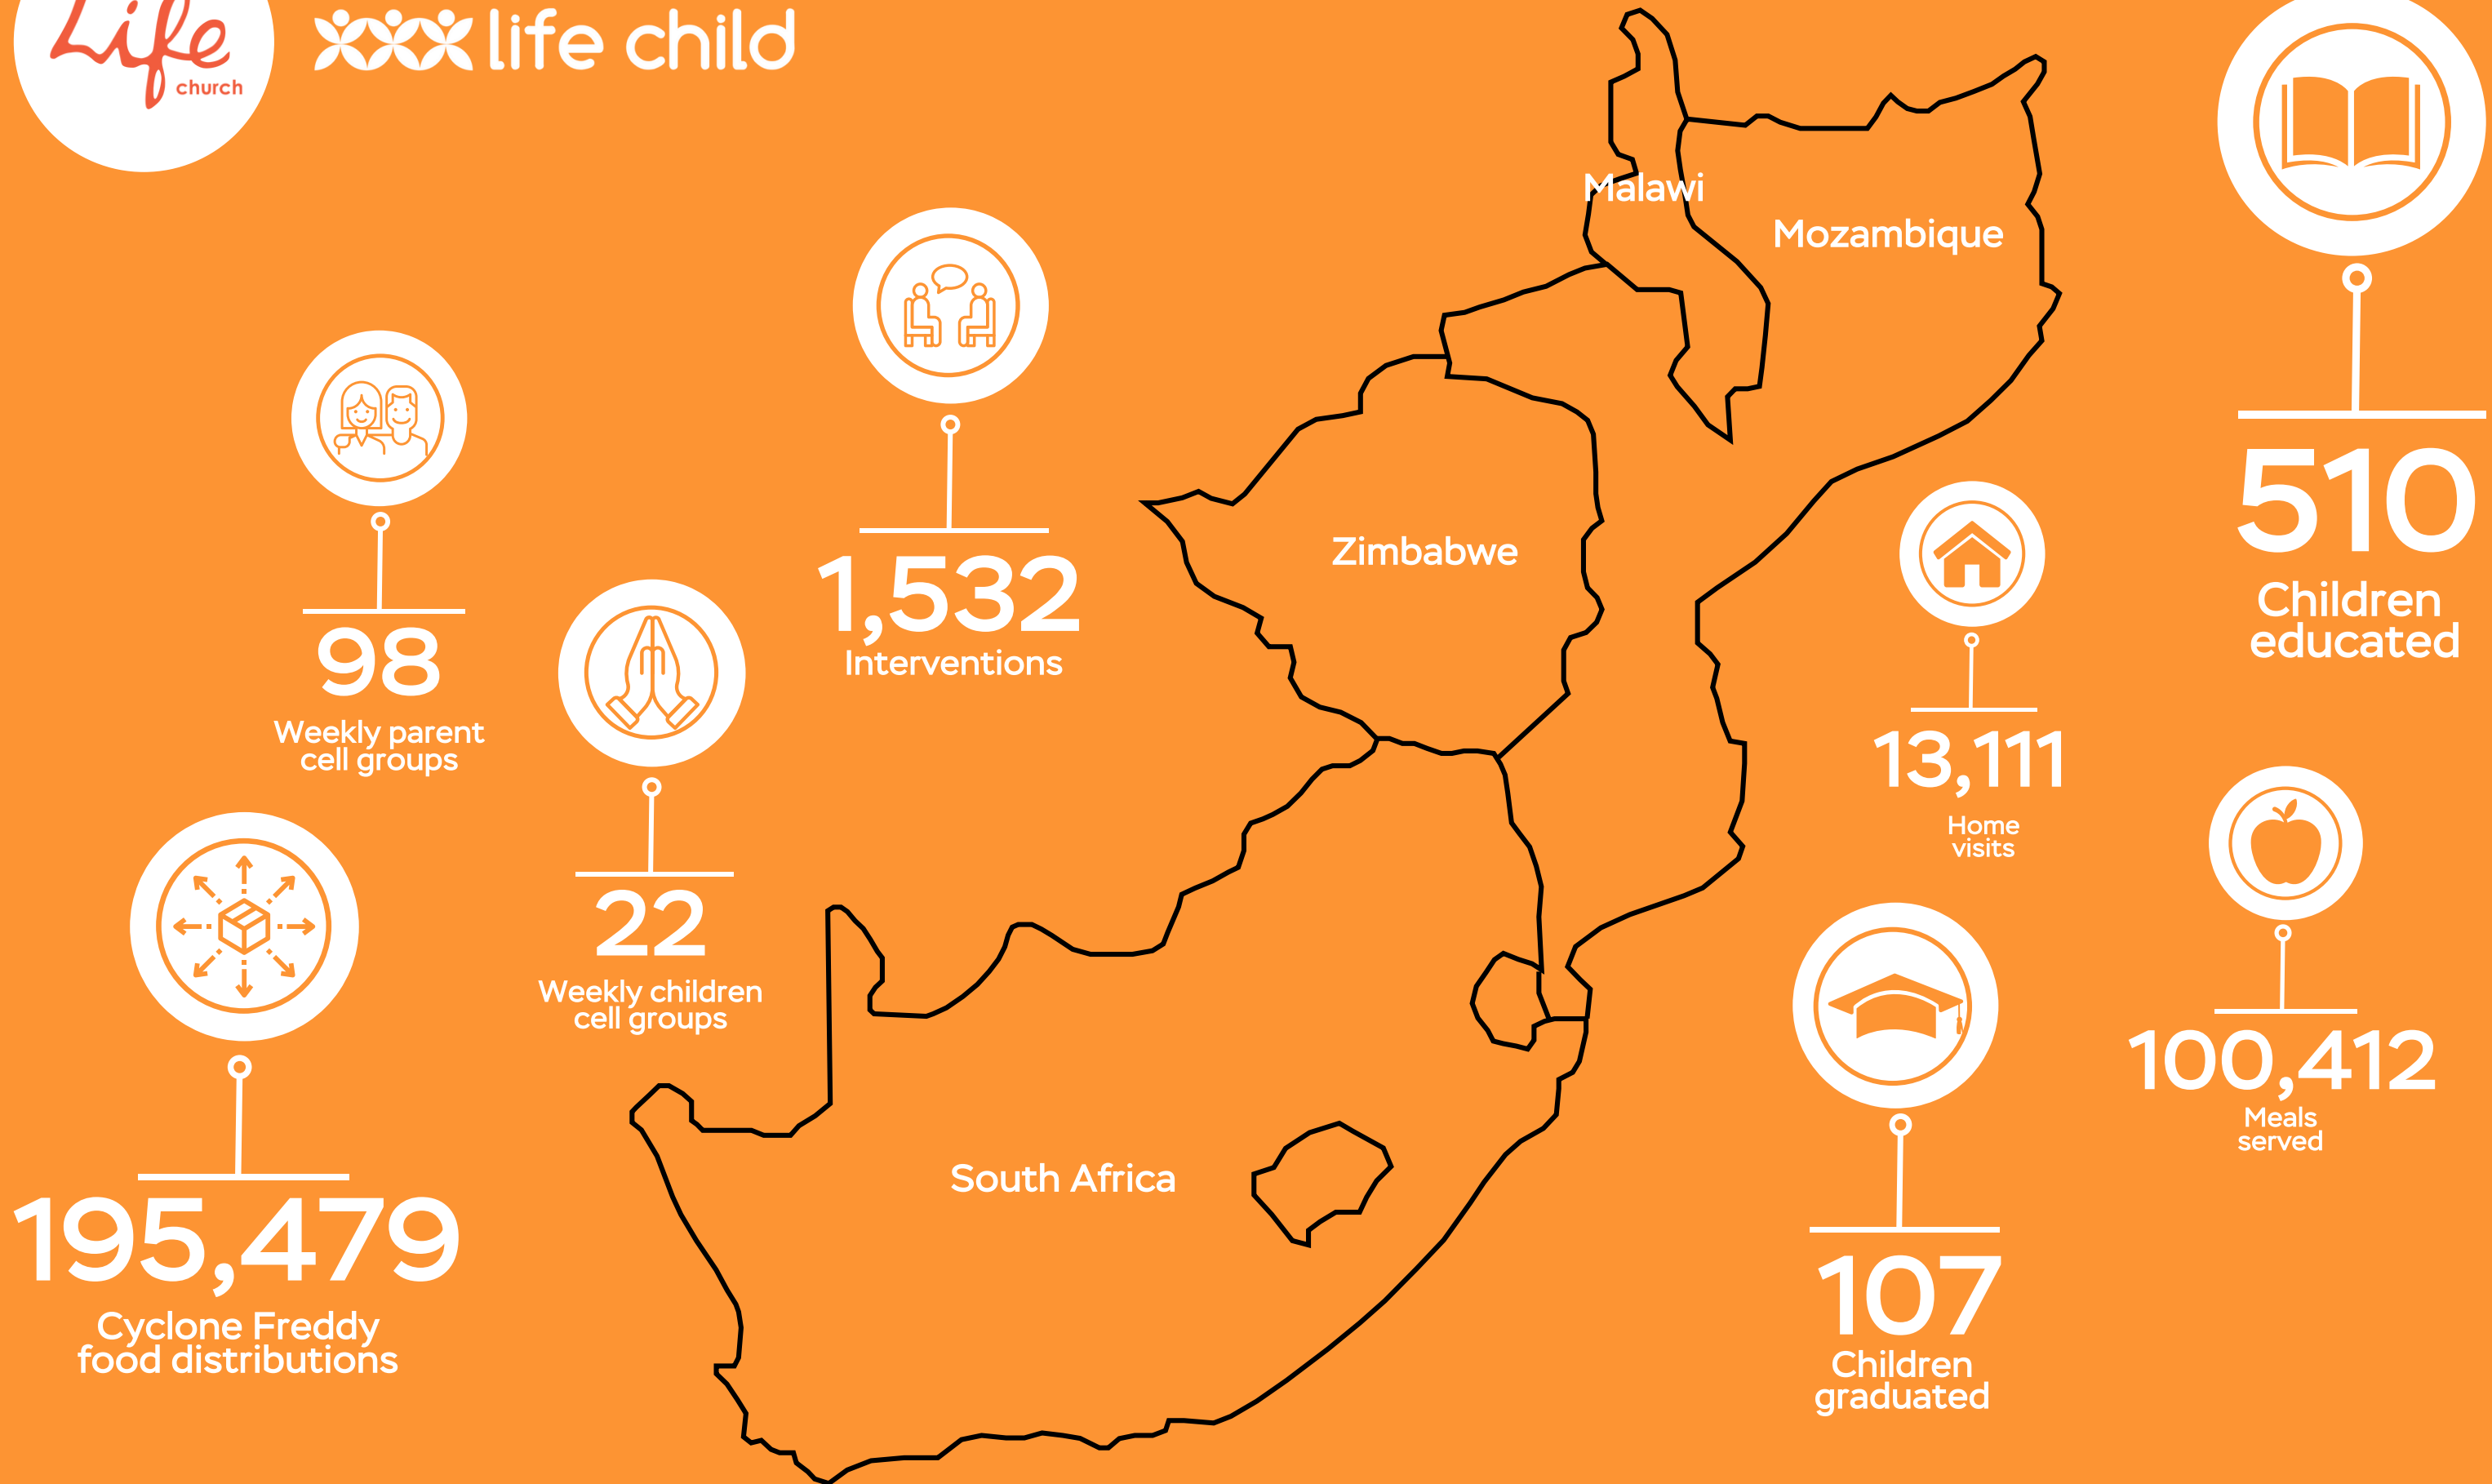

“Life Child has impacted all communities where we work by being a powerful resource of good to those who are in desperate need of being uplifted. This past year has seen us restoring, building, and extending through the kindness of those who opened their hearts to give. Children are being housed so they can feel loved and protected in a community that has seen so much strife and hardships. We are the face of hope and change through the wonderful grace of God.”

Desiree Liebenberg

life child

In Mozambique, it has been a tough year for our students and families due to the disruptions of Cyclone Freddy and a Cholera outbreak. Every part of their lives was affected including; physical, emotional, mental, social, and spiritual. Their overall **health and nutrition** were at risk. However, we are thankful that our students through the support of Life Child and partners providing daily meals and nutritional support, were able to build resilience and strength.

MOZAMBIQUE

ONE LIFE STORY

WILSON, MOZAMBIQUE

Wilson is a young 13-year-old boy from the Ilé District in Zambezia, Mozambique. He was born an Albino and unfortunately, this has severely marked his life. People with albinism in Mozambique are often victims of persecution, violence, and discrimination due to myths and superstitions, which include the use of organs or bones in witchcraft rituals, making them among the main targets of human rights violations. According to authorities, the crime that occurred with Wilson may be related to these superstitious practices, and in most cases, criminals receive orders from other people who intend to sell human organs. The crime occurred on the 18th of November 2023, in the district of Ilé. Four men took Wilson, who was sleeping on his balcony, to a forest and amputated his right arm, they also tried to amputate his left arm but fled when they became aware of the arrival of the teenager's relatives.

Wilson was transferred from hospital to hospital until he finally arrived at the Central Hospital in Quelimane where he underwent surgeries. This is where our Life Child community health workers connected with Wilson. Life Child began an urgent intervention of health and nutritional support and prayer as Wilson had lost so much blood and was largely on his own with his mom and siblings and there was no support system around them.

Dercio who is Life Child's trauma counsellor continues to walk closely with Wilson and his mom. Today, Life Child is working with social welfare in our desired placement of Wilson into the Okalawo Children's Village where we will be able to love and care for Wilson in a safe and healthy space, helping him to understand who Jesus is and His wonderful plans for Wilson. He is currently in a transitional home. He has eventually had his second surgery and has been recovering and undertaking physiotherapy.

Life Child is in conversations for a future prosthetic arm which will also make a huge difference in his future. Please keep Wilson in your prayers as he is not a commodity to be used and sold but a child who deserves to be happy, safe, and able to live the life that God planned for him. We at Life Child adhere to Psalms 82:3-4 NRSV "Give justice to the weak and the orphan; maintain the right of the lowly and the destitute. Rescue the weak and the needy; deliver them from the hand of the wicked."

In South Africa, we love to see how well our children and families have grown in all areas of their lives. Most importantly, they have grown **spiritually** through reading and discussing the Bible in cell groups (small groups) and being discipled. All of our children are vulnerable and most come from broken homes, but they have been introduced to a Heavenly Father who loves them and wants to restore them and their families. We are excited to say that some of our Foster children made the personal decision to get baptized in water and made the declaration that the old way of living is gone and they have now decided to follow Jesus.

Our Life Child staff have also had to stretch their faith and trust God for the funds to complete the renovation of our second foster home in Cape Town. We are so thankful to God and all our partners who made that happen.

SOUTH AFRICA

 life child

ONE LIFE STORY

THE XEGO FAMILY, SOUTH AFRICA

Meet the Xego family. In this family, there is a mother, a father, and their four children. The Xego family lives in a small 2-room shack home in Kosovo. Their story is a testament to what happens when God comes in and brings life into a dark and hopeless situation. Aviwe, the 38-year-old mother, was being severely abused by the father of her children, Anele. Through the referral of one of our previous parents, Nocwaca, who was a part of our family strengthening program and whose life has also been changed for the better, Life Child was able to get involved. Aviwe's 3-year-old child (at the time), Luyindalo, was invited into the preschool.

Aviwe and her children were removed and taken in by Sizakunzenza, the shelter for abused women and children. After 3 months of support and counselling, which also included counselling with Anele, she returned home. We thank God for the courage of Nocwaca, who was paying it forward! During this time at Sizakunzenza, she continued to bring Luyindalo to the preschool every day. During Aviwe's time at Sizakunzenza, she gave her heart to Jesus. She joined the weekly Adult Cell at Life Child and witnessed positive changes in her life. She began to hold onto God and trust Him in everything.

She saw her husband get a permanent job as a street cleaner and support the family; she saw her 12-year-old daughter Ayazingca join the Ex-grad Community Cell and grow in stature; and she saw 5-year-old Luyindalo grow up into a confident little man and influence his family at home, reminding them to pray before meals and eat raw carrots! During one of the home visits, young Ayazingca asked Lucy if she could join the children's cell and soon also joined Life Church Philippi. From there Ayazingca invited her mother Aviwe, her 2 brothers, and her younger sister who now all attend Life Church Philippi. Aviwe said she did not want to see her children go to church alone, so she joined them. She said, "I am so glad I did," as she too found her spiritual home. Ayazingca is now a cell intern.

In early 2024 Aviwe was invited to join our family-strengthening program. Before meeting Life Child, Aviwe said she felt her purpose on this earth was to have babies. Since she has become part of the Life Child family, she has come to realise that God has another purpose for her. Recognizing her love for cooking and willingness to volunteer, the preschool was quick to ask her to step in and cook for the preschoolers, when the cook had taken leave.

Since the intervention, the father, Anele is still on a journey of transformation. For the first time, he too attended Life Church Philippi, this month, after Aviwe invited him to church before the preschool Father's Day event. We are trusting God for complete restoration for this precious family.

Malawi, like Mozambique, was severely impacted and our children and families were deeply affected and stressed due to the devastation of Cyclone Freddy and a Cholera outbreak. Some families had to take shelter in our Moyo preschool and others were desperate to find a safe place to stay while attempting to rebuild their lives and continue with their daily activities. However, we are proud of our students that through the support of Life Child and partners, they were able to forge ahead and continue with their **education** and growth.

MALAWI

 life child

ONE LIFE STORY

CHIMWEMWE, MALAWI

Meet Chimwemwe, aged five, who lives together with his sibling and both parents. His father works as a freelance guard and his mother runs small seasonal businesses. The father's wage is too little to sustain the family, hence even if his mother tries to do small business it doesn't go far because most of the time they have to use the business money for home use. Life has not been easy for the family therefore the family was identified as vulnerable and needed support. Chimwemwe was enrolled in Moyo Preschool in 2022, and those early days were not as good for him as he struggled to adjust to school life. He was such a quiet boy and shy not associating with anybody. Even in class, it was difficult for him to learn.

As time has gone we have seen a total transformation in his life. He can associate with friends and interact with the teachers in class. This has drastically helped him intellectually; he is doing so well in class. He can write and read some sight words; mathematics and History are his favourite subjects. "He can tell me all he has learned at school", his mother said at one of the home visits. He enjoys eating rice served with eggs, play times are also a time that he looks forward to, he loves playing with toys and molding clay into different objects like cars. He is also part of a cell at school which has complimented well with his education. Life Child is so thankful for all our Life Child sponsors and partners who help us to support educational and overall development and to create safe spaces for many children just like Chimwemwe.

In all of our countries, we focus on **social development**, as there is ongoing facilitation of personal and interpersonal development and physical security of all children, allowing them to become well-adjusted family members in the community. We also harness the power of fun, creative, and physical activities, creating opportunities to unify the wider community.

In Zimbabwe, Life Child is specifically working with families to strengthen them, so that families can stay together. We are proud of the families who have taken this opportunity seriously this past year and have worked hard to make a change in their own lives and in the way that they communicate and bond with their children. They have upskilled themselves to strengthen their families economically and to become contributing members of their community.

ZIMBABWE

ONE LIFE STORY

JANA FAMILY, ZIMBABWE

Meet the Jana Family, they are a part of Life Child Zimbabwe's family strengthening program. There are six family members which include extended family members. Kundiso and Kudakwashe have two children, but they stay with Kudakwashe's sister and her 9-month-old baby.

After training day on nutrition, health, and hygiene Kundiso testified on how she was equipped to be a better mother to her family. She went home and started practicing what she had learned and has seen a great change in her family. She now knows how to plan her family's meals and keep them healthy. Before the training, her daughter used to be grumpy and not enjoying going to school, but Kundiso noticed that since she started packing a healthy lunch for her for school, she always comes home happy and energized. She realized that lack of knowledge can affect children's health and the well-being of the whole family as a change of diet has made a huge difference in her daughter's life.

Kundiso can now also help her sister-in-law with her child as she is mentally unstable. Before the training, the 9-month-old child used to rely on breast milk only but now Kundiso knows what to feed her so that she can grow healthy and free from diseases. The Jana family is now happy and healthy as they have been more equipped to deal with family life. A huge thank you to our partners, champions, and volunteers for being part of the change in Zimbabwe.

In March 2023, Cyclone Freddy ravaged Mozambique and Malawi, destroying houses, buildings, crops, and people's lives. Mudslides formed, burying hundreds of people and buildings. It was truly a travesty, and there was a strong need for aid, which Life Child supporters answered. Tough times happen to us all, but few think a natural disaster will completely usurp our lives. Many were left wondering where to begin, and that is where Life Child and Life Church stepped in. Due to the generous donations of our supporters, we were able to help those affected by the cyclone by providing shelter to many displaced families, helped rebuilt structures and providing roof sheeting, supplying many families with food parcels and daily meals, water purifiers, helping replace the buckets, blankets, clothes, household goods that they lost in the cyclone. Many vaccines were administered to prevent people from contracting Cholera. We also provided spiritual support for those who were feeling helpless and downcast.

The economic crisis, high inflation, and a rising cost of living combined with the country's structural poverty, make it necessary to create opportunities for self-employment. The facilitation of small domestic businesses and production cooperatives is an interesting alternative towards sustainability. Bi-annual skills training of vulnerable women in dressmaking and pattern-making are facilitated and at the end of the course, the ladies can set up a small domestic workshop to produce clothes at home or be part of Life Sustainability's cooperative, in Mozambique, producing clothing and other merchandise which will help with the sustainability of families and Life Child projects in time.

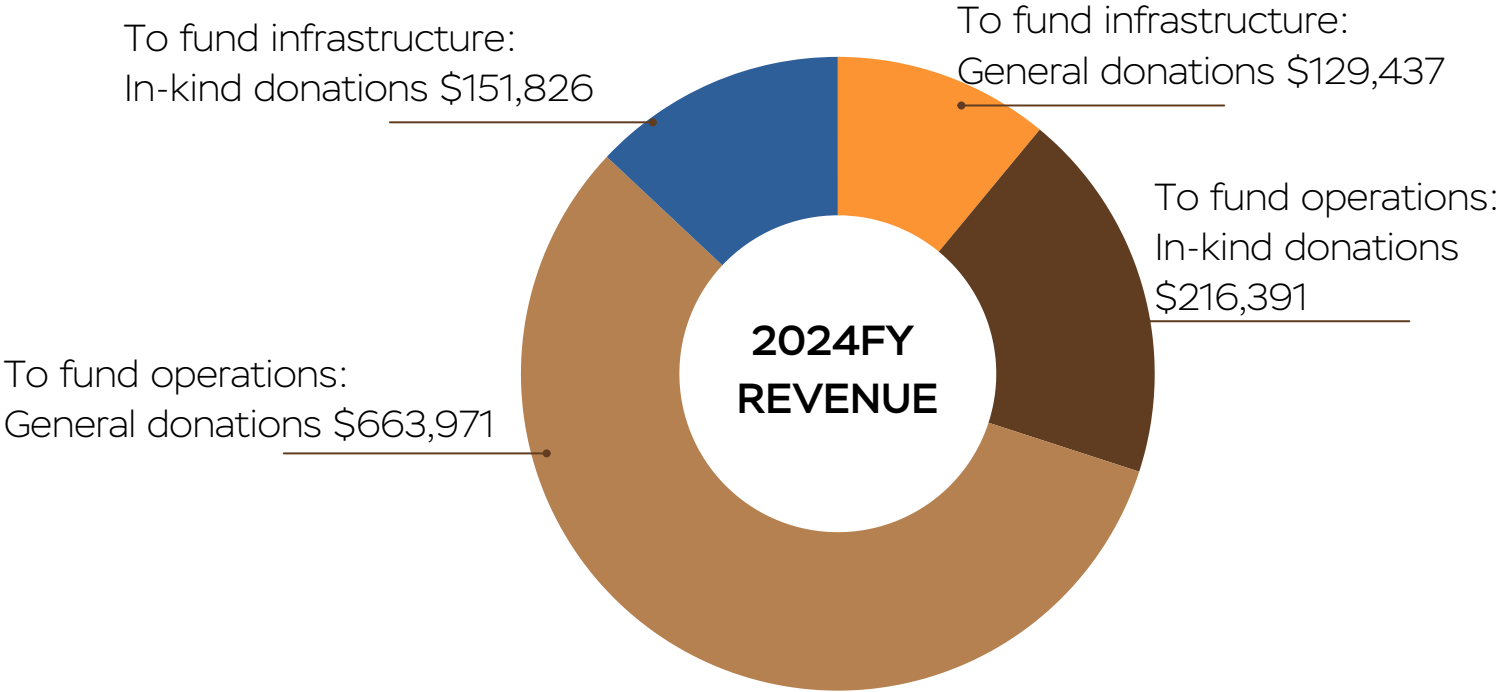

Life Sustainability has purchased 200 hectares of farmland that is currently being developed with the conclusion of a further 100 hectares in process. Our farming methodology is 100% organic, using regenerative agricultural methods. We have expanded to include cash crops such as beans and sesame. The second 1000-tree pilot harvest has been concluded enabling us to test assumptions so that we can more accurately establish forecasts moving forward. We already have a small, primary processing and packaging operation for Moringa. We are currently expanding our regional market for wholesale products and in the future export products to the International Market.

EVENTS

INTERNATIONAL WALK FOR LITTLE FEET

The 16th of September was action-packed in a way we didn't expect! Walkers worldwide who support Life Child's Walk for Little Feet event gathered together to help fundraise for vulnerable children in Sub-Saharan Africa. There were over 1300 walkers from 19 locations worldwide, from countries such as the United Kingdom, USA, South Africa, Mozambique, Malawi, and Zimbabwe.

[Watch feedback video](#)

GOLF DAY (SOUTH AFRICA)

We had a wonderful time at our very first Life Child Golf Day in South Africa!

It was hosted at the beautiful Metropolitan Golf Club Course in Mouille Point.

It was great to meet so many new people and share the heart of Life Child.

Teams received a Goodie bag, played nine holes, got the opportunity to win some fantastic prizes, ate delicious snacks, and connected.

The best part is that R30 000 was raised to be able to take care of hundreds of orphan and vulnerable children. As a bonus, our very own Nokwanda Mzimela was able to win R1000 for Life Child by doing a spontaneous putt-putt competition at the end of the last hole and getting a hole-in-one!

We want to say a massive Thank You to the following companies who participated, made donations, sponsored a hole, or sponsored a prize: AWCape, Fairtree, RE/MAX, Clovelly Golf Club, Stellenboschgolfclub, Westlake Golf Club, San Lameer Golf, The Crazy Store. Also, thank you to all the individuals who participated or donated to the event. A massive Thank you to Metropolitan Golf Club for the use of your stunning venue!

[Watch feedback video](#)

MOTION CHURCH - SPONSOR RUN (NETHERLANDS)

The Sponsor Run was a great success. Motion Church held an auction, bake sale, and the Sponsor Run. Well done to their children and their willingness to buy stuff at the auction. Children in the Netherlands running for children on the other side of the world, who they have never met in person, is extremely heartwarming. Motion Church was able to bless Life Child with €3500 (over R70 000/ \$3,800). We so value this ongoing partnership.

GO! TEAMS ON A MISSION

CHI ALPHA UCA MINISTRIES

We had 49 Chi Alpha students and staff, from Conway, Arkansas, USA. They came on a mission trip to Mozambique and South Africa, to spread the Gospel and bring hope to our Life Church and Life Child families, as well as the wider communities; for example, by going into schools to encourage the youth and rebuilding homes after Cyclone Freddy. We witnessed an incredible transformation as half of the Chi Alpha UCA Ministries team came together to rebuild a family's damaged home. Not only did they work tirelessly, but they also poured out their love by praying with and serving the children and families in our community. This is the church in action, making a tangible difference in the lives of those in need. For over 17 years, Matt Carpenter and his team have been dedicated supporters of Mission and have served alongside Life Church and Life Child Mozambique. We are immensely grateful for their partnership.

MOUNT PARAN CHURCH

Smaller teams also came to visit and heard about the heart of Life Child and saw firsthand the work that we do, one of these teams was from Mount Paran Church in Atlanta, Georgia, USA.

We were delighted to welcome and spend time with Patrick Simmons, and Mission's Pastors Larry and Patricia Morehead in Quelimane, Mozambique, as well as in Cape Town, South Africa.

We are so grateful for this new partnership, as they have begun supporting the work of Life Child, and look forward to what God has in store for this new relationship.

CHAMPION EVENTS

Our Life Child Champions have been on the move hiking Mera Peak in Nepal in heavy snow or running a relay of a distance of 1000km in 24 hours in rain and cold weather. Other Champions hosted dinners with their families and friends to raise awareness and funds.

We would like to highlight three of the many wonderful Champions:

PATRICK LECKIE FROM THE UK- HOSTED A POTJIE EVENING

Patrick Leckie is a member of our Life Child Foundation UK board, and we are grateful to have him serving with us! He decided to champion Life Child by hosting a delicious traditional Potjie dinner in October. In South Africa, a potjiekos, literally translated as "small-pot food", is a dish prepared outdoors. It is traditionally cooked in a round, cast iron, three-legged cauldron. He invited friends and family to enjoy a meal and at the same time hear about the work of Life Child personally from our CEO Anthony Liebenberg. Thank you, Patrick, for opening your home to raise funds and awareness for Life Child.

LIDIA BERNARDO FROM THE USA- HOSTED A DINNER

We want to welcome Lidia Bernardo as our newest member to join our Life Child Africa Foundation (USA) board. She has already been supporting Life Child in various ways and we appreciate the value that she adds to our board. In May 2023, Lidia decided to champion Life Child by hosting a lovely dinner with South African-themed food. Lidia may be living in the USA, but she is South African-born and has a heart for Africa. She invited friends and family to hear about the heart behind Life Child as our CEO Anthony Liebenberg shared stories of lives that had been impacted. People enjoyed the evening and new partners were added to the Life Child family. Thank you, Lidia, for being a Champion!

ANTHONY LIEBENBERG FROM SA, MERA PEAK ADVENTURE

"In May this year, Anthony and Jacques van der Merwe set out to summit the 6500 m-high Mera Peak in Nepal, to champion the cause of Life Child. A Life Child Champion is someone who uses what they enjoy to raise awareness and funds towards the work of Life Child. Anthony and Jacques are seasoned hikers, having already climbed – on separate occasions – Mount Kilimanjaro and Everest Base Camp between them. Attempting to conquer Mera Peak together, and going through rigorous training regimes, they set out for Nepal, optimistic of a successful hike while creating awareness."

[Please read our article that was published in Joy Magazine, to find out what happened](#)

THANK YOU!

HONOURING THE WINDLES

We want to highlight an amazing couple from the United Kingdom who have been wonderful partners of Life Child for many years, Stewart and Annette Windle. Annette is currently a trustee for Life Child Foundation UK and has been since 2021. This lovely couple is retired now, but Annette used to be a nurse and Stewart was in construction. They have such a massive heart for the children in Africa. They have been partnering every month and also helped towards making the renovations of our second foster home in Philippi, Cape Town, possible. Annette has acted as a Champion and used WhatsApp to raise awareness and funds for Life Child among her community of friends and family. She has been organizing a small Walk For Little Feet in her area for a few years now.

The Windles are not just partners from afar, but for many years, they have been traveling back and forth between England and South Africa. They love it so much in Cape Town that they even owned a second home here. Every time they come to visit our Life Child family in Philippi, it feels like a family reunion. They have always asked when they visit the foster home “What can I fix?” or “How can we get involved?”

Legacy giving is the decision to leave a legacy that lasts and makes an impact on future generations. Legacy Gifts refers to donations that you can plan to give to Life Child after your passing/ to be included in your will. However, there are instances where people don’t wait until they pass but donate it in advance. As such is the case with Stewart and Annette, as the one-bedroom apartment that they owned in Cape Town was their second home, they decided to leave it to Life Child. This is an amazing blessing that will continue to give back for a long time, as the income from renting out this property will continue to fund the work of Life Child.

Thank you, Stewart and Annette! May you continue to enjoy this season of retirement with your children, grandchildren, and friends. On behalf of all the Life Child staff, children, and families, we Thank You and honour you!

FUTURE PROJECTS

This past year our project initiatives changed somewhat due to the serious damage created by Cyclone Freddy, which made landfall in Quelimane, Mozambique in March and extended its impact into Blantyre, Malawi. God connected us to EMI (Engineering Ministries International) who extensively evaluated the damage and made necessary recommendations and a new masterplan to create additional resilience and safe spaces due to the dramatic climatic changes taking place. All future project structures will reflect these recommendations where necessary in the countries in which we work.

Below is a list of projects for the next 12 months:

- Completion of the additional classrooms at the Peace School in Mozambique, which is currently a primary school for Grades 1-6.
- This includes structural corrections recommended by EMI to classrooms, residences, and the clinic at the Okalawo Children's Village. These structural roof changes will enable greater resilience.
- In Chimoio we are raising funds to build a new multi-purpose venue including a Montessori ECD, which will educate children from 3-5 years old, totalling 120 children.
- We will continue renting a building for our Moyo Montessori ECD in Malawi. As we keep trusting for funding to build a multi-purpose venue to educate children from 3-5 years old, totalling 120 children.
- We have now received full funding to purchase land in Zimbabwe and are still trusting for the funding to build a multi-purpose venue including an ECD, where we can educate 3-5 years old, totalling 120 children. In the meantime, we are looking for a building to rent for five years.
- We are believing for funding to purchase land to build a multi-purpose venue which will include the capacity to enlarge our Montessori ECD to 60 children in Phillipi, South Africa. For more information, click here: [Get up, Build up, Step up: 13 Peaks Challenge](#)

If you require more information or would like an extensive list of our projects, email us at info@lifechild.org.za.
